## JD PROJECT HIGHLIGHTS

### Prolific Region in British Columbia

- Metal endowed Toodoggone gold-copper mining district
- World class Stikine Terrane, similar to Golden Triangle
- Renewal of historic mining camp: Kemess Mine (Centerra)
- Emerging district: Lawyers, Ranch (Thesis), Shasta, Baker, Mets (TDG)
- Mining friendly, active jurisdiction
- Large land package, ~15,000 ha mineral tenure

### Epithermal Au-Ag and Porphyry Cu-Au

- Two deposit types: Epithermal gold-silver mineralization, Porphyry-related copper-gold mineralization
- Significant historic drilling, holes selectively sampled
- Strong multi-element soil anomalies across several targets
- Under explored, significant discovery potential

## BUCK PROJECT HIGHLIGHTS

### District Scale Potential

- Mining friendly jurisdiction, proximal to former and developing mines: Equity Silver (Newmont), Huckleberry (Imperial), Blackwater (Artemis)
- Existing infrastructure, year-round access
- Low cost of exploration
- Large tenure package, ~52,000 hectares near Houston, B.C.

### Buck Main Au-Ag-Zn

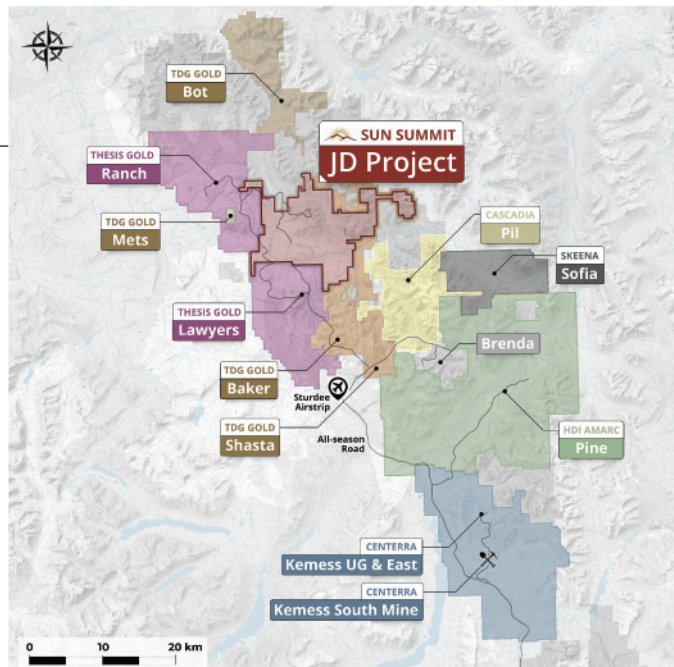

- Near surface bulk tonnage-style mineralization
- Significant high-grade gold zones
- Open in all directions and at depth, upside potential
- Initial Mineral Resource Estimate planned for Q1 2024

### CR Cu-Mo-Au-Ag (acquired from Teck Resources)

- Target areas show strong porphyry-related mineralization
- Strong discovery potential, open for expansion

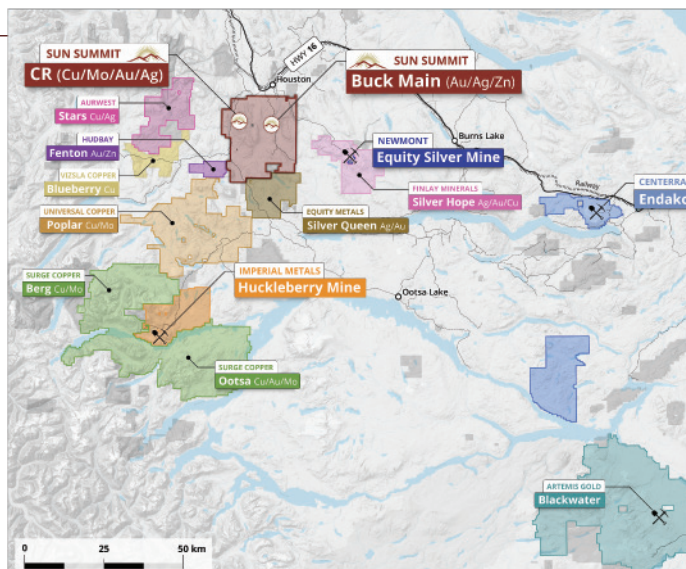

*Drill intervals highlighted are downhole core lengths. True widths are unknown.*
